

Medical Coding and Billing

With medical care and health information management growing more complex and with increased scrutiny from health insurance companies, regulators, courts and consumers, this online training certificate program is a starting point for individuals entering the medical coding field. Completion of the Medical Billing and Coding course prepares students to sit for the American Health Information Management Association (AHIMA) national certification exam, certified coding associate (CCA), as well as to compete for entry-level medical coding or billing positions.

Six-Sigma Black Belt Certification

The Six Sigma approach seeks to identify and remove the causes of defects and errors in manufacturing and business processes. It uses a set of quality management methods, including statistics, and creates a special infrastructure of people within the organization who are experts in these methods. Each Six Sigma project carried out within an organization follows a defined sequence of steps and has quantified financial targets.
