NON-DISCRIMINATION AND EQUAL OPPORTUNITY POLICY

Ivy Tech Community College seeks to develop degree credit programs, courses, and community service offerings and to provide open admission, counseling, and placement services for all persons, regardless of race, color, ethnicity, national origin, marital status, religion, sex, gender, sexual orientation, gender identity, disability, age, or veteran status. Faculty, staff, and students are expected to fulfill their educational responsibilities in compliance with this policy. Cases of perceived harassment or discrimination should promptly be reported to either the Vice Chancellor for Academic Affairs, either Vice Chancellor for Student Affairs, or the Director of Human Resources/Affirmative Action Officer or Incident Report on MyIvy. All reported occurrences will be investigated and appropriate corrective action taken, if necessary.

BOOKLET DISCLAIMER

This booklet is intended to supply accurate information to the reader. The College reserves the right to change the Program and course requirements; however, every effort will be made to inform students of any program changes. This handout and its provisions are not in any way a contract between an applicant and the College.

BLOODBORNE PATHOGEN POLICY

Healthcare personnel are at risk for occupational exposure to bloodborne pathogens, including hepatitis B virus (HBV), hepatitis C virus (HCV), and human immunodeficiency virus (HIV). Exposures occur through needle sticks or cuts from other sharp instruments contaminated with an infected patient’s blood or through contact of the eye, nose, mouth, or skin with a patient’s blood. Important factors that influence the overall risk for occupational exposures to bloodborne pathogens include the number of infected individuals in the patient population and the type and number of blood contacts. Dental Assisting students are required to have up-to-date immunizations and an annual TB test.

All dental assisting and dental assisting faculty are strongly encouraged to have up-to-date immunizations and an annual TB test. All dental assisting faculty and students are required to use proper infection control measures, including the use of PPE (personal protective equipment) when working in the dental clinic.

POLICY REGARDING FACULTY, STAFF, OR STUDENTS WHO HAVE INFECTIOUS DISEASE

It is the policy of the dental assisting program that any student enrolled in the program, faculty teaching in the program, or student applying to the program who poses a risk of transmitting an infectious agent should consult with the appropriate health care professionals to determine whether providing professional services would represent any material risk to the patient. If such a risk is possible, the faculty or student will not be allowed to engage in any professional activity that would create a risk of transmission of disease to others.

All procedures regarding this policy will ensure confidentiality of information in accordance with HIPAA guidelines.
BLOODBORNE AND AIRBORNE PATHOGENS
EXPOSURE PROTOCOL

Effective August 15, 2017
What Are Bloodborne Pathogens?

Bloodborne pathogens are infectious microorganisms in human blood that can cause disease. These pathogens include, but are not limited to, hepatitis B (HBV), hepatitis C (HCV) and human immunodeficiency virus (HIV). Exposures may occur through needle sticks or cuts from other sharp instruments contaminated with an infected patient’s blood or through contact of the eye, nose, mouth, or skin with a patient’s blood.

What to Do When a Bloodborne Pathogen Exposure Occurs:

If you experience a contaminated needle stick or sharps cut, or are exposed to the blood or other body fluid of a patient during the course of your work, immediately follow these steps:

• Wash needle sticks and cuts with soap and water
• Flush splashes to the nose, mouth, or skin with water
• Irrigate eyes with clean water, saline, or sterile irrigates
• Report the incident to your Ivy Tech instructor and clinical supervisor
• Immediately seek medical evaluation and treatment by a medical professional. Do not wait. Source testing of blood to determine infectious disease status is preferred whenever possible where consent has been obtained. When an exposure occurs at a clinical facility, you should follow that facility’s policy as they will handle notice and consent with the source. When an exposure occurs at an Ivy Tech facility, the instructor should advise the source following an incident and ask if the source will consent to testing at a medical provider of his or her choosing.

Review these suggested resources:

• Emergency Needle Stick Information (CDC): http://www.cdc.gov/niosh/topics/bbp/emergnedl.html
• Post-Exposure Prophylaxis (PEP) Resources: http://nccc.ucsf.edu/clinical-resources/pep-resources/pep-quick-guide/

For clean needle/sharp sticks, wash the affected area with soap and water. You do not need to seek medical care unless there is a visible injury, which requires attention. Report the incident to your Ivy Tech instructor and clinical supervisor.

Where to Seek Treatment:

• You may seek treatment at the clinical site (if equipped and willing), an urgent care facility, emergency room, or physician office for assessment, diagnosis, and treatment. It remains your responsibility to obtain the initial appointment and any follow-ups ordered with a health care provider of your choice. If an incident occurs in an Ivy Tech classroom, lab or facility, an instructor cannot provide evaluation, diagnostic test or treatment beyond first aid and emergency assistance.
• Time of day and facility capability may impact where you seek treatment. The key is to know your options before an accident, and then, obtain an evaluation and treatment as soon as possible from a health care provider of your choosing.

• Report the incident to your Ivy Tech instructor and submit a Student Accident Report promptly, but no later than 24 hours. The accident report is a web-form completed via MyIvy > Student > Student Resources > Policies & Procedures or at www.ivytech.edu/accident.

What Happens Next?

A health care provider will provide an evaluation, diagnostic testing (if necessary), and treatment (if necessary). Diagnostic testing may include testing the source of the exposure, with his or her consent, and baseline testing of the exposed person. Testing for HIV, HBV, and HCV is typically included, along with other blood tests or diagnostic examinations the health care provider recommends. If post-exposure prophylaxis (PEP) is indicated, efficacy is time sensitive. The first dose should be given as soon as possible. Optimal time to start PEP is within hours of exposure, rather than days1.

Will I need follow-up testing? This direction will come from the health care provider. Follow-up will depend upon the testing outcome of the source person. It is important for your health that you understand and comply with the provider’s follow-up testing and recommendations.

February 1, 2019

Dear Interested Candidate,

Thank you for your interest in the dental assisting program, offered at the South Bend Campus. Attached you will find the application steps, information session dates, and information about the program, the current suggested curriculum sequence, and the forms needed to complete the application process.

Ivy Tech Community College, South Bend dental assisting program currently accepts 12 -14 students a year into the program. The program begins in January, the spring semester of each year, and graduates in December. Our program is 12 months in length. Three semesters in length, spring summer and fall. There are four pre-requisite courses that must be completed prior to entering the program. The dental assisting program is a full-time program, primarily with daytime courses. Our students are in classes, labs or clinics, Monday through Friday. We are on campus, or externships anywhere from 20 - 36 hours a week depending upon the semester. Students will complete 440 hours of clinical externships hours.

Upon Completion of the Ivy Tech dental assisting program in South Bend, students’ will graduate with:
- Certified Dental Assistant from the Dental Assisting National Board after successfully completing three board exams, Infection Control, Radiology Health and Safety, General Chairside.
- CPR – certification
-Indiana Radiology license – Upon successfully passing Radiology Health and Safety board exam.
- Certificate in Coronal Polishing and Caries Prevention
- Certificate in Expanded Functions

Ivy Tech Community College is a non-profit school. Ivy Tech Community College is accredited by, the North Central Association of Colleges, and Schools. The Dental Assisting program, is accredited by the Commission on Dental Accreditation.

If you have any questions, feel free to contact me at 574-289-7001 ext. 5720 or email at tfisher59@ivytech.edu.

Sincerely,

Tisa Fisher, CDA, EFDA, BA
I. DENTAL ASSISTING PROGRAM

a. PROFESSIONAL OVERVIEW

The educationally qualified dental assistant today plays a vital role as a member of the dental health team. Didactic, laboratory, and clinical content are included in a one-year academic program. Each state has a dental practice act that governs which duties a dental assistant can and cannot perform.

b. INTRODUCTION

Welcome to the South Bend Campus of the Ivy Tech Community College. Ivy Tech is the largest college in Indiana and the largest community college in the nation. The Dental Assisting Program is fully by the accredited American Dental Association Commission on Dental Education. The program is twelve (12) months in length, has a spring start and graduates are awarded Technical Certificate upon completion.

The purpose of this application booklet is to explain basic information about the program of study, and the admission process. We encourage you to read this document thoroughly and mark any areas that may raise questions and warrant clarification. Please call the School of Health Sciences office at (574) 289-7001 or e-mail Professor Fisher at: tfisher59@ivytech.edu for additional information.

The Dental Assisting Program has specific ability requirements, which include physical, mental and technical. A list of those abilities is enclosed with this document. If an applicant has questions about these statements, or if the applicant would like to request accommodation for his/her disability, please contact the Director of the Dental Assisting Program, Professor Fisher at: tfisher59@ivytech.edu.

It is important to note that acceptance to the program is separate from admission to the College. Students must be accepted into the college prior to applying to the dental assisting program. To apply to the college visit: http://www.ivytech.edu/apply-now/ The Dental Assisting Program has a limited enrollment of 12 qualified full-time students per entering class and begins in the spring semester of each year.
c. PROGRAM OVERVIEW
The academic portion of the Dental Assisting Program consists of two (2) semesters and one (1) summer session. Most courses are offered in the daytime hours. Clinical experience is an integral part of the educational experience for all Dental Assisting students. The Dental Assisting Program establishes affiliation agreements with dental offices in the surrounding community to provide student-learning experiences. General dentistry offices as well as specialty offices are included as resources.

d. Dental Assisting curriculum is presented in a lecture/laboratory format. The lecture presents principles of dental practices, infection control and dental procedures. The laboratory portion of these courses provides hands on experience with dental techniques and instrumentation. Upon successful completion of the Dental Assisting Program of study, students are eligible to sit for the Dental Assisting National Board Certification Examination. A passing score on this examination allows the graduate to apply to become a Certified Dental Assisting (CDA).

DESCRIPTION OF THE PROFESSION

The dental profession is dedicated to providing patients with optimum oral health care. In becoming a dental assistant, the assistant will be a representative of the profession, and extension of the dentist in his/her practice. The dental assistant must have the ability to perform under pressure in stressful and emergency situations. A stable temperament, a strong sense of responsibility, patience, and concern for detail are required. Manual dexterity and physical stamina are vital. Most duties require sitting for extended periods of time with bending, reaching, pulling, and pushing occurring repeatedly during a normal eight (8) hour work day. The dental assistant’s full attention and focus is mandatory for the task being performed.

e. PROGRAM MISSION AND PURPOSE

The mission of the dental assisting program at Ivy Tech Community College in South Bend, is to advance the mission of the college by providing quality educational programs, which will graduate competent oral health professionals, who through critical thinking, ethical decision making and lifelong learning will meet the dental needs of the diverse communities we serve. Faculty define, education as a teaching/learning process, whereby the assimilation of appropriate knowledge, skills, and ethical decision making; We strive to graduate National Board-Certified Dental Assistants’ who are competent, and a credit to their profession. We are Ivy Tech, Indiana’s Community College. We serve the people of our state through accessible and affordable world-class education and adaptive learning. We empower our students to achieve their career and transfer aspirations. We embrace our vision of economic transformation inspired by the education and earnings attainment of our citizens, the vitality of our workforce, and the prosperity of our unique and diverse communities.

It is very important that you carefully read and follow this guide concerning the Admissions/application process. It is your responsibility to become familiar with the information and seek advisement as needed.
II. APPLICATION PROCEDURE

APPLICATION TO THE COLLEGE

STEP 1

APPLY Complete the Ivy Tech Community College new student application through www.ivytech.edu. After you have submitted a complete application, the applicant will receive information in the mail within 7-10 business days. Upon receiving your acceptance letter, the following steps are in order:

- Apply for financial aid
- Attend a new student orientation
- Complete your ACCUPLACER assessment (required)*
- Meet with an advisor (required)

*ACCUPLACER INFORMATION
ACCUPLACER is a suite of tests that determines your knowledge in math, reading and writing as you prepare to enroll in college-level courses. ACCUPLACER is used to identify your strengths and weaknesses in each subject area and to help you improve your skills through interactive online learning tools. The results of the assessment, in conjunction with your academic background, goals and interests, are used by academic advisors and counselors to place you in the appropriate college courses that meet your skill level.

Scheduling the ACCUPLACER Test
All students must have a current application on file in the Admissions office before scheduling ACCUPLACER Test.

Preparing for the ACCUPLACER Test
We encourage all students to spend time reviewing the sample test:
The ACCUPLACER is free and may be taken up to a maximum of three times per calendar year.

Learn more about Accuplacer.

Brush up on your skills! The higher you score, the fewer classes you'll have to take, which will save you time and money in the long run.
Accuplacer Study Guide
Accuplacer Sample Questions
Free Accuplacer Study App

The Accuplacer is free and may be taken up to a maximum of three times per calendar year.
Learn more about Accuplacer.
STEP 2 ACADEMIC ADVISING

INTRODUCTION: After you have completed the College Application procedure, and have completed all recommended Academic Skills Advancement courses, we recommend you meet with the dental assisting advisor to schedule your dental assisting prerequisite course work. To schedule a meeting with Tisa Fisher, the dental assisting advisor, call the School of Health Sciences at 574-289-7001 and request an appointment. Your Dental Assisting advisor will assist you in scheduling your Dental Assisting prerequisite courses.

Contact the School of Health Sciences for times and dates of Dental Assisting information sessions.

Step 3

APPLICATION TO THE DENTAL ASSISTING PROGRAM

When you have attended a Dental Assisting Information session and completed the required prerequisite courses (or you are in the fall semester completing the prerequisite course) you may apply to the dental assisting program. The application can be found on the final page of this overview. Complete the application and return to the School of Health Sciences, Dental Assisting Program on or before the deadline November 15, 20--

*** THE DEADLINE IS NOVEMBER 15, 20-- ***

NOTIFICATION OF ACCEPTANCE

Notification of your status will be given by December 29, in the year you apply. Notification of acceptance or non-acceptance to the Dental Assisting Program will be given via email. Accepted applicants will also receive a formal acceptance letter by mail. At that time, accepted applicants will be requested to sign a statement of commitment to attend the program. This
form needs to be completed returned to the School of Health Sciences within 7 business days. **Failure to return the statement of commitment may cause the applicants status to change from accepted to non-accepted. It is very important to return the commitment statement by the date specified in the letter.**

**DENTAL ASSISTING ORIENTATION**
Accepted applicants will be required to attend a mandatory orientation meeting in January prior to the start of the spring semester. At this time students will register for spring classes and receive information pertaining to program requirements such as: physical exam and immunizations forms, CPR information, Criminal background check, drug screen, dress code, and textbooks) *(See page 16 of this Overview Booklet for more details)*
III. STUDENT SELECTION CRITERIA

The Dental Assisting Program is a selective admission program. Admission is offered the top 12 students who earn the greatest points in the selection process. The remainder of the applicants are placed on a wait list until the class is full. The following criteria are proposed as the minimum requirements to be established by Ivy Tech Community College for acceptance into the Dental Assisting Program.

1. PREREQUISITE GRADES

grades in earned in the required prerequisite courses are assigned points and totaled. Students are rank ordered based on the number of points they earn.

Points are assigned to grades as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>6 points</td>
</tr>
<tr>
<td>B</td>
<td>4 points</td>
</tr>
<tr>
<td>C</td>
<td>2 points</td>
</tr>
<tr>
<td>D, W/WF</td>
<td>0 points</td>
</tr>
</tbody>
</table>

If multiple attempts are made to complete the prerequisite courses the higher grade of the first two attempts will be counted. A grade of W or WF is considered a grade.

2. TRANSFER POLICY

Post-secondary course work that is applicable to the curriculum may be transferred from other accredited colleges on a course-by-course basis provided the student has earned a “C” or higher grade. Official transcripts with general studies courses need to be submitted to the registrar.

Transfer students, in good standing, from other CODA accredited Dental Assisting Programs may be admitted on a space available basis.

IV. ADDITIONAL INFORMATION

1. INDIANA LICENSURE REQUIREMENTS

In the state of Indiana requires dental assistants hold a Radiology License to expose x-rays. Graduates of the Ivy Tech Dental Assisting program are eligible to sit for the Radiology Health and Safety portion of the Dental Assisting National Board which is required for Licensure in Radiology in Indiana. For additional information on licensure requirements for Dental Assistants see page 20.

2. HEALTH HISTORY AND ESSENTIAL FUNCTIONS

All Dental Assisting applicants must have a physical exam within the first month of the spring semester. The physical includes, updated immunizations, tuberculosis skin test and an evaluation of essential abilities. If student have a positive tuberculosis skin test, they will be expected to follow the advice of their physician. Any student who does not complete the health forms or refuses to follow the advice of their physician will be withdrawn from the clinical rotations, jeopardizing graduation from the program.
The *Essential Abilities* document is provided to give the potential dental assisting applicant a description of the type of physical/technical abilities necessary to complete the program or work in the typical dental setting. The applicant is encouraged to consider the physical requirements of the program, and to make an appointment with the program chair to discuss concerns or requests for accommodation for his/her disability. Student with documented need for accommodations are to meet with the campus Disabilities Support Service Representative. See page 21

3. OCCUPATIONAL EXPOSURES TO BLOOD
What Healthcare Personnel Need to Know

Introduction
Healthcare personnel are at risk for occupational exposure to bloodborne pathogens, including hepatitis B Virus (HBV), hepatitis C virus (HCV), and human immunodeficiency virus (HIV). Exposures occur through needlesticks or cuts from other sharp instruments contaminated with an infected patient’s blood or through contact of the eye, nose, mouth, or skin with a patient’s blood. Important factors that influence the overall risk for occupational exposures to bloodborne pathogens include the number of infected individuals in the patient population and the type and number of blood contacts. Most exposures do not result in infection. Following a specific exposure, the risk of infection may vary with factors such as these:

- The pathogen involved
- The type of exposure
- The amount of blood involved in the exposure
- The amount of virus in the patient’s blood at the time of exposure

You employer/clinical site is provided with the Ivy Tech Community College system for reporting exposures in order to quickly evaluate the risk of infection. This may involve testing your blood and that of the source patient and offering appropriate post-exposure treatment.

How can occupational exposures be prevented?
Many needle-sticks and other cuts can be prevented by using safer techniques (for example, not recapping needles by hand), disposing of used needles in appropriate sharps disposal containers, and using medical devices with safety features designed to prevent injuries. Using appropriate barriers such as gloves, eye, and face protection, or gowns when contact with blood is expected can prevent many exposures to the eyes, nose, mouth, or skin.

Additional courses required for the Associates of Applied Sciences in Dental Assisting degree, listed below. These courses may be taken before entering the dental assisting program or after completing the Technical Certificate.

VI. STUDENT RESPONSIBILITIES
ACADEMIC INTEGRITY

At Ivy Tech Community College, learning is valued and honored. Our learning community cannot thrive if its students copy the work of others, known as plagiarism, and seek an unfair advantage over their fellow students by cheating. The academic standards of Ivy Tech Community College are based on a genuine pursuit of knowledge and demand a high level of integrity from every one of its students.

When this trust is violated, the learning process suffers injury and steps must be taken to ensure that learning standards remain meaningful. Cheating and/or plagiarism are grounds for immediate dismissal from the College. All students are encouraged to avoid dishonest behavior and seek available tutorial and counseling services to help them succeed. (Please see current Student Handbook, for further details).

STATEWIDE CONDUCT

The reputation of the College among the community depends, in large part, upon the behavior of its students. Students enrolled in the College are expected to conduct themselves in a mature, dignified and honorable manner. Students are entitled to a learning atmosphere free from discrimination, harassment, sexual harassment and intimidation. This applies to all conduct among faculty, staff and students.

Students are subject to college jurisdiction while enrolled at the College. The College reserves the right to take disciplinary action against any student whose conduct, in the opinion of college representatives is not in the best interests of the students, other students, or the College. Students who are disciplined should expect to find their sanctions enforced at other Ivy Tech campuses. (Please see current Student Handbook, for further details)

ATTENDANCE POLICY

Attendance at scheduled class meetings or other required activities is essential. Instructors establish and enforce attendance policies, maintain attendance records, and excuse student only for bona fide reasons. Satisfactory attendance is necessary to achieve educational objectives and maintain financial aid and veterans’ benefits. (Please see current Student Handbook, for further details)

Within the DA program, students are expected to attend all classes, laboratory sessions and clinical. Should a student be absent from 10% of the class/clinical activities per semester, they will receive a written warning as documented on the Student Status Report. Should a student be absent from 20% of the class/clinical activities per semester, they may be dismissed from the program due to potential patient safety issues.

DISCIPLINARY ACTION

Cases of student misconduct and/or lack of academic integrity are to be referred to the Program Chair, then to the Dean of Health Sciences and finally to the Vice Chancellor of Academic. A student who violates the rules and regulations of the College may be subject to disciplinary actions, which may include, but not limited to the following.
1. Verbal reprimand  
2. Restitution for damages  
3. Restriction of privileges  
4. Failure of the assignment or course  
5. Withdrawal from a course, program or the College for the remainder of the semester or term  
6. Suspension from the College for one calendar year  
7. Dismissal from the College for five years  

Students are provided an opportunity to appeal any disciplinary decision and are required to sign a waiver if they choose to waive the right to appeal. (Please see current Student Handbook, for further details)  

DUE PROCESS (STUDENT GRIEVANCE PROCEDURES)  

The student grievance process is an appropriate mechanism to deal with violations of student rules of conduct and conversely allows a student with a disagreement to grieve against a college employee’s decision affecting the student. The College encourages students to resolve their complaints informally. The informal grievance procedures are designed to accomplish a quick and effective resolution. The College formal grievance procedure is also available.  

If you have problems with a class (regardless if it is general education or professional course), the following is a list of individuals you will need to meet with to discuss your grievance issue. You must meet with these individuals in the order listed. If the issue is resolved, you will not need to see the next person.  

You must make an appointment to speak to the following individuals:  

1. Instructor of course  
2. Program Chair for the program/course  
3. School Dean for the program/course  
4. Vice Chancellor of Academic Affairs  

Please refer to the Ivy Community College-South Bend, current Student Handbook for further information concerning this matter.  

RE-ADMISSION TO THE PROGRAM  

If a student is dismissed from any campus/region of Ivy Tech Community College, that individual is dismissed from the College. (Please refer to the current Student Handbook, for further details.)
VII. FINANCIAL INFORMATION

FINANCIAL AID

Ivy Tech Community College offers a variety of financial aid programs to students who need assistance to continue their education. The College Financial Aid Office administers most programs for federal, state, and institutional aid under specific policies and guidelines. Eligibility for most financial aid at the College is based upon the student’s demonstrated financial need. Students seeking financial aid are required to complete the FASFA form by the first week of March.
General fees for Indiana residents are $140.61* per credit hour and $275.08* per credit hour for non-residents. In addition, a $60.00 Technology Fee will be assessed to each student, each semester. Total fees and estimated costs for the twelve-month program are:

**Books, supplies, uniforms, and accessories are estimated costs only. There may be fee’s related to additional required supplies. Students are also required to purchase a Kilgore Typodont for class and laboratory sessions.
Background:
The purpose of requiring criminal background checks and drug screenings on students who will have direct patient contact within a health care facility or laboratory is to ensure patient safety and protection. By doing so, students meet the same standards as health care facility employees. Individuals receiving care are often physically and emotionally vulnerable. Students have access to personal information about the patient and/or his/her family, access to the patient's property, and provide intimate care to the patient. Health care facilities are obligated to document that any individual authorized to provide such care does not have a criminal history of use of illegal substances or illegal use of pharmaceuticals, mistreatment, neglect, violence, defrauding the public, or otherwise taking advantage of another person.

For the purposes of this document, “clinical” refers to any type of course in which the student may have patient contact as a part of the course, regardless of actual course title or location of the patient interaction. Other examples of relative course titles include internship, externship, clinical practicum, etc.

Implementation:
Effective August 4, 2010, criminal background checks and drug screenings will be required for all currently enrolled clinical students and newly admitted students in School of Health Sciences’ programs. Some regions will have already implemented the practice of requiring criminal background checks and drug screenings for some or all students in School of Health Sciences programs, due to the requirements of clinical affiliates. The implementation of a statewide policy will provide consistency for Ivy Tech School of Health Sciences programs.

Completion of a criminal background check and drug screening are required for admission and/or clinical placement in Health programs. The criminal background check and drug screening may be done either before enrollment in the professional courses or just prior to the first day of clinical or externship (the timing will vary among programs, based upon when in the curriculum sequence the students will first be involved with patients as well as timing requirements from clinical affiliates). Additional criminal background checks and/or drug screenings may be required in programs in which students are enrolled in clinical courses for multiple semesters.

Students who are enrolled in some courses for credit or non-credit, but who are not in a degree-seeking program, may be exempt from the drug testing and background check requirements in this policy. These non-degree seeking students may have different or separate requirements for drug testing and/or criminal history background checks.

Process:
The student is responsible for completing the online processes and other required paperwork, paying for the criminal background check and drug screening, working with the company providing the criminal background check and drug screening for any follow-up information or testing that may be required, and monitoring the results of the criminal background check and drug screening. By participating in the required criminal background check and drug screening, students are giving the college permission to release information as needed to the clinical affiliates. All costs for criminal background checks and drug screenings are the responsibility of the student.
Students who are not continuously enrolled in a program until completion may be required to complete additional checks upon re-entry to a program or admission to a different program in the School of Health Sciences. Clinical sites or the College may request additional background checks or drug screenings at their discretion.

Students who are denied clinical placement or who are withdrawn from enrollment in a clinical course due to clinical site refusal to accept students with positive findings on criminal background checks or drug screenings, may reapply to the same or different School of Health Sciences program the next semester, but will need to comply with additional criminal background checks or drug screenings as required. College program admission and progression policies will apply. If a student is denied placement for clinical at one site, up to two more attempts will be made to place the student at other clinical sites, if others sites are available.

The student will initiate the required background check and drug screening with the company of the College's choice by the due date designated by the program.

The background check will include the following elements (and additional elements may be added if required by the clinical site):

- County, state, and federal criminal record searches of all places of principal residences for the past 7 years (or since age 18, if less than 25 years old). Records will be verified against all known names and addresses as revealed on the social security report.
- National criminal history database that includes 50-state sex offender and Office of Foreign Assets Control (OFAC) List of Specially Designated Nationals (SDN).
- OIG/GSA Sanction Reports, US Treasury, Applicable state exclusion list
- Social security verification and residency report
- Maiden name and alias report

The drug screening will include the following elements (additional elements may be added if required by the clinical site; Note: examples of common names for drugs or illegal substances are listed in the parentheses):

- Marijuana (cannabis, weed, hemp)
- Cocaine (coke, snow, blow)
- Opiates (morphine, codeine)
- Amphetamines and methamphetamines (Ritalin, Ecstasy, speed, meth)
- Phencyclidine (PCP, angel dust)
- Propoxyphene (Darvon)
- Barbiturates (Valium, Librium)
- Methadone (oxycodone, hydrocodone, Vicodin)
- Benzodiazepines (Versed, Dalmaine, Restoril, Xanax)
- Methaqualone (Quaalude, Sopor)

The College will provide clinical sites an assurance that background checks and drug screenings will be completed for every student. The student, the college, and clinical sites will have access to the secure web-based results. By participating in the screening processes, the student is authorizing release of the results to the College and the clinical sites. Students who refuse to comply with the background check and drug screening will not be eligible to enroll in clinical courses, and therefore will not be eligible to enroll, progress, and/or graduate from the program.

The student will have access to findings of the criminal background check and drug screening, via the results posted on the secure web site, as required by the Fair Credit and Reporting Act. The student has both the responsibility and the right to challenge any information in the findings that the student believes
to be erroneous with the company providing the background check and drug screening. The student is responsible to present documentation of any clarification of the findings to the College, and the College may share that documentation with the clinical site(s).

Clinical sites have the right to refuse any student for clinical placement. Policy at clinical sites may vary in whether or not students with particular positive findings on the background check will be allowed to attend clinical. In the event there are positive findings on any portion of the criminal background check, a primary clinical site will be notified and requested to make a decision on whether or not the student will be allowed to complete a rotation at the site, in light of the specific positive findings on the criminal background check. If the clinical site will not allow the student to participate in clinical at that site, the program chair will contact up to two additional clinical sites offering the same type of clinical experience, if available, to attempt to place the student. If these attempts do not result in a clinical site placement for the student, the student will be notified that s/he may not enroll in clinical courses and any co-requisite courses. In most cases, this will mean that the student will not be able to progress in the program, and will therefore not be able to complete the courses required for graduation.

The student may reapply to the same program or another program in the School of Health Sciences the next semester. The student will need to complete the criminal background test again if s/he is readmitted. College program admission and progression policies will apply.

**Disclaimers:**
- Completion of a criminal background check and drug screening for a Health Sciences program does not ensure admission to or continued enrollment in any program.
- Completion of a criminal background check and drug screening for a Health Sciences program does not ensure eligibility for licensure, credentialing, or future employment. Additional criminal background checks and/or drug screenings may be required for licensure, credentialing, or employment.
- Clinical affiliates can establish more stringent standards for criminal background checks and/or drug screenings than those required by the College, and students will be required to meet those standards.
- Clinical affiliates can conduct additional background checks and drug screenings (including random drug screenings during clinicals) at their discretion.
- Completion of background checks and/or drug screenings from other vendors, such as those required by current employers of the students, may not be used in lieu of the College requirements.
- If a student is found to be ineligible for clinical placement at any time during the program, the student will be withdrawn from the clinical course and any co-requisite courses pending resolution of the situation.

**Protection of confidential information from the background checks and drug screenings:**
Information obtained from the result of student background checks and drug screenings will be treated as confidential information, and protected from unauthorized access. Authorization to view the results will be limited to individuals who make clinical assignments and designated individuals at clinical sites requesting the information for students placed at the sites. Release of the results of criminal background checks and drug screenings to clinical sites is given for the purpose of clinical placement. In the event that a student is prevented from enrolling in and/or completing a clinical course or courses due to the results of the drug screen and/or criminal history background check, a printed copy of the results and a memorandum summarizing the rationale and action(s) taken at that time will be maintained in a secure (locked file cabinet) School of Health Sciences file for seven (7) years.
**Guidelines for Campus-Based Clinical Services:**
 Certain School of Health Sciences programs* may offer services to the general public and/or Ivy Tech students and employees in campus-based laboratories or clinics. In these courses, the Criminal Background Check and Drug Screen results will be reviewed by the Program Chair, and a determination will be made on whether or not each student is able to participate in the patient care activities based on the results. Any recommendation by the Program Chair to not allow a student to participate in patient care activities based on the results of the Criminal Background Check or Drug Screen results will be reviewed and approved by the School of Health Sciences Dean and the Vice Chancellor for Academic Affairs.

**Drug Screen:**
Students with any positive result on the drug screen, and not otherwise cleared by the testing company after retesting and/or medical officer review, shall not participate in patient care activities, including accessing patient health information, providing any type of direct patient care, or assisting another health care worker with patient care.

**Criminal Background Check:**
Students with any criminal conviction or guilty plea for the following shall not participate in patient care activities, including accessing patient health information, providing any type of direct patient care, or assisting another health care worker with patient care:

1. Rape
2. Criminal deviate conduct
3. Exploitation of an endangered adult or a child
4. Failure to report battery, neglect, or exploitation of an endangered adult or a child
5. Theft, if the person’s conviction for theft occurred less than ten (10) years before the date of submission by the person of an application for the criminal background check for the purposes of entering or completing an educational program at Ivy Tech Community College
6. Conviction of any crime which requires registration with any state or national Sexual Offender Registry
7. Aggravated murder
8. Murder
9. Voluntary manslaughter
10. Felonious assault
11. Kidnapping
12. Sexual Battery
13. Aggravated arson
14. Aggravated robbery
15. Aggravated burglary
16. Any misdemeanor or felony drug law conviction

*Examples of programs which may have campus based clinical experiences for students include Dental Assisting, Dental Hygiene, and Therapeutic Massage.*
INDIANA DEPARTMENT OF HEALTH
LICENSURE ELIGIBILITY

Successful completion of the dental assisting program, as described in the Admission, Progression, and Graduation policy, provides eligibility for a student to apply to The Indiana State Department of Health for a Radiology licensure. The following questions are asked on the Indiana State Department of Health application for a license to operate x-ray equipment. If you answer YES to any of these questions the Indiana State Department of Health may deny or delay issuing you a license to expose radiographs even if you satisfactorily complete Ivy Tech Community College’s dental assisting program. It is the student’s responsibility to resolve these issues with the Indiana State Department of Health. Students who have questions regarding licensure eligibility should contact the Indiana State Department of Health.

Answer each of the following questions “Yes” or “No”. If you answer any of the questions “Yes”, please provide a complete explanation on a separate sheet.

- Have you ever been convicted of a felony? Yes/No
- Have you ever been denied or had a license/certification revoked? Yes/No
- Have you ever been formally notified of any complaint against you relative to the practice of radiologic technology? Yes/No
- Do you have a drug or an alcohol abuse problem or any mental or physical disability that, through the practice of your duties, may be dangerous? Yes/No

radiology@isdh.in.gov.
