

ASN Student Learning Outcomes

Upon completion of the program, the graduate will be able to:

1. Function within the role of the associate degree nurse, incorporating professional, legal and ethical guidelines, to provide collaborative, safe, culturally competent, and holistic patient-centered care.
2. Analyze data and the relationships of the biological, psychosocial, cultural and spiritual components of patient needs to improve quality and safety of patient care
3. Demonstrate effective use of technology to navigate the electronic health record, communicate with inter/intraprofessional teams, and be involved with decision making in the delivery of quality and safe patient care.
4. Integrate current evidence-based practices and critical thinking techniques to develop the patient's plan of care.
5. Utilize communication practices that foster effective collaboration with patients, families and the inter/intraprofessional team for planning and delivery of quality patient care.
6. Promote a culture of caring and advocacy that demonstrates respect for individual patient preferences, values, needs and the diversity of the human experience.
7. Assume accountability and responsibility in fulfilling the role of the associate degree nurse, through personal and professional growth, integration of current evidence-based practice and understanding of multiple dimensions of patient-centered care.
8. Provide leadership in a variety of healthcare settings to diverse patient populations.

General Education Outcomes
