Prepares Student for ICAR Pro Level 1 Non Structural and Refinish Certification and ICAR Welding Certification

Total Credits 18

The Maintenance and Light Repair Certificate is a great way to gain hands on experience in the automotive repair field while receiving instruction on the important technological advancements in the automotive industry. This certificate helps the student in becoming proficient in the basic automotive maintenance. The automotive repair field is a career choice that will allow the student to choose where they want to live and is in high demand. This career cannot be outsourced or discontinued as vehicles are becoming so complex that people will have to turn to trained technicians for vehicle repair.
