The Automotive Technology program offers exciting careers and unlimited opportunities. Through the use of equipment used in the automotive industry today and ASE master certified instructors, students learn how to diagnose and repair today’s high-tech vehicles. This program will prepare students for entry-level employment with companies that require training in areas such as: electrical systems, engine performance, transmissions, brakes, steering and suspension systems, air conditioning systems and engine repair. Students are prepared to take industry standard certification exams from ASE.
