Ivy Tech Community College’s Associate Accelerated Program (ASAP) helps you earn an associate degree in just 11 months and prepares them to transfer to a four-year college to earn your bachelor’s degree.

Coursework is spread over five eight-week terms, and classes are held from 9 a.m. to 5 p.m., Monday through Friday. Attendance is mandatory for all class sessions and students are encouraged to work less than 20 hours per week if they hold outside employment. It’s a rewarding program—but a rigorous one, that will essentially become your full-time occupation until graduation.

Classes are held in small, closely-knit groups known as “cohorts.” Classmates will remain with their cohort throughout the program — encouraging, assisting, and depending on each other every step of the way.

A dedicated ASAP advisor helps you identify your academic goals, then maps out a clear path you can follow to success, while faculty teams of four teachers per term offer individual attention. Graduates of ASAP leave with not just an associate degree, but with the skills they need to succeed in further studies—and the workforce.

ASAP is a selective cohort based learning model. If you are interested in being considered for the program, learn more at IvyTech.edu/asap. You will also need to apply to Ivy Tech if you haven’t already. Fill out the free application at IvyTech.edu/ApplyNow.
