IVY TECH COMMUNITY COLLEGE
LAFAYETTE REGION
SCHOOL OF HEALTH SCIENCES

MEDICAL ASSISTING PROGRAM
STUDENT HANDBOOK
ACADEMIC YEAR

2014 - 2015
NON-DISCRIMINATION AND EQUAL OPPORTUNITY POLICY

Ivy Tech Community College provides open admission, degree credit programs, courses and community service offerings, and student support services for all persons regardless of race, color, creed, national origin, religion, gender, sexual orientation, physical or mental disability, age or veteran status. The College also provides opportunities to students on the same non-discriminatory opportunity basis. Persons who believe they may have been discriminated against should contact the campus affirmative action officer, Human Resources Administrator, or Vice Chancellor for Student Affairs. Ivy Tech Community College of Indiana is an accredited, equal opportunity/affirmative action institution.

BOOKLET DISCLAIMER

This handbook is intended to supply accurate information to the reader. The College reserves the right to change the Program and course requirements; however, every effort will be made to inform students of any program changes. This handbook and its provisions are not in any way a contract between an applicant and the College.

Introduction

This handbook introduces you to the Medical Assisting program, and provides program information which is beneficial and in many cases, essential for students to know. It is expected students will read the entire handbook, ask for clarification when needed, and refer to it as needed, or directed, while a student of the program.
Accrediting Organizations

The College is accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools.

The Higher Learning Commission
230 South LaSalle St., Suite 7-500
Chicago, IL 60604-1413
312-263-7462
www.ncahlc.org

The Medical Assisting Generalist Technical Certificate is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) upon the recommendation of the Medical Assisting Education Review Board (MAERB).

Commission on Accreditation of Allied Health Education Programs
1361 Park Street
Clearwater, FL 33756
727-210-2350
www.caahep.org

Graduates with the Generalist – TC are eligible to take the national exam to become a Certified Medical Assistant (CMA(AAMA)). The American Association of Medical Assistants Certifying Board (AAMA CB) awards the CMA(AAMA) credential after successful completion of the exam.

CMA(AAMA) Certification

The CMA(AAMA) is awarded to candidates who pass the CMA(AAMA) Certification/Recertification Examination. The National Board of Medical Examiners serves as test consultant for the exam. The CMA(AAMA) credential must be recertified every 60 months by the continuing education or re-examination method.

This is considered by the U. S. Department of Education to be a “Gainful Employment” program. Information about program length, cost, loan debt, graduates, and related occupations can be found at http://www.ivytech.edu/academics/gainful-employment.html.

Philosophy

It is the mission and intent of the Medical Assisting faculty to view the educationally qualified student as a person who has received specified general, administrative, and clinical training that allows them to function as a productive and valuable member of the
health care team in an ambulatory healthcare facility. Faculty defines education as a teaching/learning process whereby the assimilation of appropriate knowledge, skills, and judgment produce a graduate who is a credit to his/her profession, as well as one who successfully completes the CMA (AAMA) certification examination, which attest to the level of competency attained. Consistent with the philosophy of Ivy Tech Community College, faculty accepts the responsibility for effective teaching of students through a realistic correlation of foundational knowledge with real-world (on-site) experiences. Furthermore, faculty feels that application of knowledge and skills in realistic situations is necessary in order for the students to become an integral supporting link in the environment of professional health care practice. The graduate contributes to the well-being of the patient by demonstrating professional competency while assisting in the care of the patient.

**College General Education Outcomes**

Upon completion of the program, the graduate will be able to:

1. Demonstrate critical and creative thinking.
2. Recognize and understand cultural and individual differences, in terms of both contemporary and historical perspectives.
3. Recognize and understand social, political, civic, and environmental responsibilities relative to our society.
4. Apply basic scientific concepts in a variety of settings
5. Communicate effectively in written, oral and symbolic forms.
6. Exhibit quantitative literacy.
7. Apply ethical reasoning.
8. Demonstrate the acquisition and use of information.

**Program Goals**

1. Prepare competent entry-level medical assistants in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains.
2. Prepare graduates for a career in an ambulatory healthcare setting that require multi-skilled health professional, performing both administrative and clinical tasks within their scope of training.
Terminal Program Objectives

Upon completion of the program, the graduate will be able to:

1. Participate as a member of the health care team by giving complete and loyal support and working in close harmony with other health care team members.

2. Protect the health of the patient and coworkers by carefully following Standard Precautions Guidelines and OSHA mandates.

3. Hold in strict confidence all things seen or heard in the facility pertaining to patients and other team members by carefully following HIPAA standards and guidelines.

4. Employ effective communication techniques in interacting appropriately with patients, their support persons, and members of the health care delivery system.

5. Demonstrate professional conduct which reflects favorably on the educational institution and the employer.

6. Participate in patient care within the medical assistant scope of training.

7. Apply to sit for the certification exam in pursuit of earning the CMA (AAMA) credential.

8. Demonstrate competent psychomotor and affective domain performance of all administrative and clinical skills.

9. Achieve cognitive, psychomotor, and affective domain learning objectives as established by the Medical Assisting Education Review Board (MAERB) and upon which the educational goals of the program are founded.

Terminal Program Outcome Statements

All students completing the capstone course (MEAS 260) will sit for the national certification examination given by the AAMA.

Teaching Facilities

All facilities and resources of the Ivy Tech Community College are available to Medical Assisting students. Students are encouraged to use support services available at the home campus, as well as on-line. Instructional support services include among others: tutoring and learning centers, the Ivy Tech Virtual Library, campus libraries, and use of Blackboard to enhance course delivery.
Externship Facilities

The externship experience is an integral part of the educational experience for all Medical Assisting students. The Medical Assisting program has affiliation agreements within each regional service area. For more information on clinical affiliates, please contact the Medical Assisting Program Chair at your home campus.

Student Support Services
http://www.ivytech.edu/student-services/

Advising

Ivy Tech Community College uses a faculty advisor system. On admission, each degree student is assigned a program advisor whose purpose is to:

- Assist the student in course selection and program planning.
- Guide the student in meeting the requirements for graduation as prescribed by the College.
- Ensure that appropriate technical and general education courses are included in the chosen course of study.
- Students may meet with their program advisor during a designated registration session as needed during each semester.

Health Services

For students registered in credit courses, the College provides accident insurance in a designated amount for injuries sustained while participating in College-sponsored activities. The activity must take place on College premises or on any premises designated by the College. Students are also covered while traveling to and from College-sponsored activities as a member of a group under College supervision. It is the student’s responsibility to report injuries or accidents occurring on campus promptly to the instructor or to the Office of Student Affairs so that proper medical treatment may be administered. If the College officials deem necessary, emergency medical services may be requested. If a student has a seizure or black out while on campus emergency medical services will be notified. Ivy Tech Community College does not provide on-campus medical or mental health services. Medical and mental health services are available at local hospitals and clinics.

Career and Employment Services

The Office of Career and Employment Services is available to help you in a number of ways:

- Employment Referral
- Career Assessment
- Labor Market Information
- Occupational Reports
- Work-Study Positions
- Resume/Cover Letter Assistance
- Job Shadowing
- Practice Interviews
- Community Employer Portfolios
- Co-op Education Opportunities
Housing
Ivy Tech Community College is a commuter college and does not operate residence halls. However, the Office of Student Affairs may be able to respond to questions concerning housing in the community. Ivy Tech accepts no responsibility for locating, approving, or supervising local student housing.

Transportation
All necessary transportation to clinical experience is the student’s responsibility and is not provided by the school. Students are expected to comply with parking designations. Handicapped parking spaces and visitors areas are reserved for those purposes, and vehicles improperly parked in those areas may be ticketed or towed at the owner’s expense.

Disability Services
Students pursuing the Medical Assisting program must be capable of fulfilling the Essential Functions of Medical Assisting Program Students included in the Admission, Progression and Graduation Policies section of this booklet. Reasonable accommodations for persons with disabilities will be made to ensure access to academic programs, services, and employment in accordance with section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990. College programs and facilities are designed to be accessible to students with disabilities. Each campus has designated parking and special restroom facilities for these students. Support services also will aid students with disabilities with career planning, financial aid, and placement. The College staff works with the Department of Vocational Rehabilitation and other service agencies to assist students with disabilities through available local community resources.

It is the student’s responsibility to contact the campus Disability Services representative to request accommodations; any information shared will be kept confidential unless the student authorizes release and exchange of specified information. Requests for accommodations and documentation of disability must be received one month prior to enrollment for the next academic term. Additional time may be required for some requests. Every effort will be made to provide reasonable accommodations in a timely manner.

Students who request accommodations are expected to participate in an intake interview with Disability Services if requesting specific services, academic adjustments or other accommodations for a disability. Prospective students should schedule an intake interview prior to attempting any part of the admission process if accommodations will be required for the information session, academic assessment, completing forms or scheduling classes. The intake process, including intake interview and documentation on file, should be completed at least one month prior to the need for accommodations. Documentation of the disability must be on file with the Disability Services office prior to services being provided. Late requests may delay accommodations. In accordance with the above procedure, federal guidelines and respect for individual privacy, no action will be taken without a specific request.
If you would like more information about the Disabled Student Development program at Ivy Tech Community College, please contact the Lafayette Region Disabilities Support office at 765-269-5615 or disabilitysvcslaf@lists.ivytech.edu. All students are expected to meet entry requirements. Essential elements of courses and programs and licensing requirements relevant to a program curriculum cannot be waived, although they may be reasonably accommodated. Please refer to the regional contact information at the back of this handbook.

If you will require assistance during an emergency evacuation, notify your instructor immediately. Look for evacuation procedures posted in your classroom.

**Financial Information**

[http://www.ivytech.edu/financialaid/](http://www.ivytech.edu/financialaid/)

**Tuition and Fees**

Tuition and fees are set by the State Board of Trustees and are subject to change. Expenses will include tuition, fees, books, uniforms, and other materials/equipment for use in the clinical area. At the time of participation in any certification pathway, the Medical Assisting student will incur expense associated with obtaining the required physical examination, immunizations, tuberculosis testing, and Basic Life Support (CPR) certification, criminal background check and drug screen. Students should also anticipate costs associated with applying for certification upon completion of the Medical Assisting, Technical Certificate (TC) program.

**Financial Aid**

Ivy Tech Community College offers various types of financial aid to students who need assistance to continue their education. Students are encouraged to carefully survey the available financial aid options. Students must be accepted for admission to the college in an eligible program to receive financial aid. For additional information on financial programs administered through the College, please make an appointment to see a financial aid advisor on your home campus.

**Financial Obligation**

The Business Office is responsible for the collection of any outstanding obligations to the College. A person with an outstanding account will be denied certain College services. For example, official transcripts may not be obtained, registration forms will not be processed, and diplomas will not be issued.

**Liability Statement**

Professional liability insurance coverage is provided to all students enrolled in clinical/externship courses within the Medical Assisting program. The limits of liability for the Institutional Professional Liability coverage are $1,000,000 for each medical incident and $3,000,000 aggregate. This coverage extends to clinical/externship experience at an institution other than the College when it is a part of the College training program. Each student may obtain additional individual liability insurance.
Admission, Progression, and Graduation Policies

Admission/Selection
Each region may have a defined process for registration in any course required in a certification pathway with limited clinical/externship availability.

This admission selection process is used at Lafayette.

STEP ONE: Admission to the College

- Contact the Admissions Department for College admission requirements.

STEP TWO: Admission to the Program

- **Advising:** Attend a required program information session and/or meet with a program advisor; contact your advisor for campus-specific advising requirements.

- **Prerequisites:** Complete pre-requisite requirements
  - Any academic skills advancement courses identified by your COMPASS/ACCUPLACER test.
  - Cumulative GPA of 2.0 or better.
  - Program course pre-requisites (these must be completed before admission to program is made)
    - HLHS 101
    - ENGL/ COMM 1XX
    - APHY 101
    - SOCIAL SCIENCE or HUMANITIES ELECTIVE

- **Program Application:** Submit a program application prior to the established deadline date. Contact your advisor for campus-specific information on how to obtain an application packet and application deadline.

- **Selection Policy:** When there are more qualified applicants than seats available, a point system will be utilized to determine who is admitted to the program.
  - Applicants having the highest points will be offered admission to the program according to the number of clinical spots available.

- **Course Points – maximum 24 points**
  
  \[
  A = 6 \text{ points} \quad B = 4 \text{ points} \quad C = 2 \text{ points} \quad D/F = 0 \text{ points}
  \]

  *Points awarded for credit received by CLEP test out = 3 points.*
• **Tie Breaker** – Cumulative GPA (to 2 decimal places)

Application to program may be obtained at the School of Health Science office or online at [www.ivytech.edu/medical-assisting/index.html](http://www.ivytech.edu/medical-assisting/index.html).

**Lafayette Region**

The following courses require Program Chair approval prior to registration:

**Attendance**

**College**

Students are expected to attend class meetings, or other activities assigned as a part of a course of instruction, on a regular basis. Instructors are responsible for maintaining attendance records. A statement regarding expectations for class attendance is included in the College Catalog. Instructors will also identify attendance expectations in the individual course syllabi.

Students should confer with instructors in advance if absences are anticipated. If the option for making up work exists (for anticipated or unexpected absences), the student is responsible for consulting with instructors immediately upon return in order to make necessary arrangements. Instructors will complete Student Status Reports when classes/activities are missed a sufficient number of times to jeopardize successful course completion, and will forward forms to appropriate personnel for follow-up.

**Medical Assisting Classroom, Lab, and Clinical**

**Classroom and Lab Attendance Policy**

Students are expected to attend all lecture and lab sessions. Attendance is necessary to maximize student-learning opportunities. Students who are absent are responsible for missed material. Attendance will be kept for the purpose of financial aid qualification. Specific expectations will be found in each course syllabus.
Externship Attendance Policy

Externship courses require the presence of the student for evaluation of having met course objectives, as such course objectives cannot be accomplished or evaluated outside the externship setting. Additionally, certification eligibility generally requires completion of a specific number of contact hours in an externship assignment. Furthermore, it may not be possible to provide make up for externship experiences. Therefore, regular attendance is mandatory for successful externship course completion. The externship courses in the Medical Assisting program are MEAS 260. The total number of hours required at the student’s assigned externship site is 200.

Attendance issues will be reflected in the final professional behavior evaluation grade.

Tardiness to externship experiences jeopardizes continuity of client care. Tardy is defined as not arriving at the designated assignment at the assigned start time, or leaving before the assigned time ends.

Externship faculty have the authority to exclude a student from an externship session. The reasons for such exclusion include, but are not limited to, tardiness greater than 30 minutes, a student’s lack of preparation for the experience, student illness, impairment of the student to perform safely, or failure of a student to follow affiliating agency, Medical Assisting Program, and/or College policies. A student will not be given credit towards the required externship hours if they are excluded, or in any manner removed, from an externship site.

Students must remain at the externship site until dismissed by the instructor or externship site supervisor. Leaving the externship site early will be counted in the student’s total absence time.

Students are not allowed to leave and then return to externship without expressed permission from the Externship Coordinator and the externship site.

Externship hours may be made up on a limited basis with approval from the Externship Coordinator and externship site manager.

Students are responsible for tracking their own absences/tardiness times on the attendance sheet provided by the Externship Coordinator (EC) at the beginning of the externship experience. This attendance sheet must be submitted to the EC on a weekly basis for verification.

Pregnancy does not preclude participation in the program. This is a decision between the student and her physician. Students must discuss potential hazards in the healthcare environment with their physicians. Pregnant students are discouraged from taking externship courses during the semester of their due date as externship attendance policies are not waived.
Students who develop illnesses or conditions involving limited activity must provide a physician’s written statement that they are physically and mentally capable of undertaking the Essential Functions of Medical Assisting Students as outlined in this handbook. Students will not be permitted to participate in externship without this written physician’s statement.

Withdrawals and Refunds

Student withdrawal (W) is a status referring to voluntary student withdrawal beginning at the start of the third week of the course for a 16-week semester up to the end of the week marking the completion of 75 percent of the course. It is the student’s responsibility to withdraw from a course(s). A student may withdraw from a course by filing a change of enrollment form at the Registrar’s Office. The College will refund students’ fees, with the exception of any late registration fee, on the following schedule for a 16 week semester.

From Registration to the end of the 10th day of the semester 100% Refund
Day 11 or later of semester 0% Refund

Progression and Readmission

College Progression and Readmission Policy
Please refer to the College Catalog for policies related to academic standards and readmission following dismissal from the College for violations of rules of conduct and/or failure to meet and maintain academic standards. Students enrolled in the Medical Assisting Program must be in good academic standing according to College policy.

Progression in Medical Assisting Generalist Pathway Courses
Students are expected to progress each semester in the certification pathway sequence. Students who withdraw or do not successfully complete with a minimum grade of “D” all prerequisite courses to a course with a clinical/externship component will not be eligible to progress to enrollment in the clinical/externship course. Should there be any term of non-enrollment in the required sequence of courses, including failure to progress, the student will be required to demonstrate retained competency in the course objectives of any required pre-requisite course(s) before continuing in the required sequence of courses. Demonstrated retained competency is typically satisfied
by obtaining a repeat passing score on final exams, comprehensive laboratory exams, and skill check-offs. Students unable to demonstrate retained competency of any required pre-requisite courses will be required to satisfy the requirements of an individually developed remediation plan as a condition of enrollment in any clinical/externship course in which patient safety is contingent upon retained knowledge. Enrollment in clinical/externship courses is dependent upon available cohort space.

Credit for Prior Learning

Ivy Tech Community College proposes to acknowledge the prior learning experiences of both current and prospective students by awarding credit for appropriate prior learning. Such prior experience could include but is not limited to the following: workplace learning, military experiences and training, college-level credit from other institutions, nationally recognized testing, certifications, and community service.

Transferring

The College encourages articulation between programs offered at each campus and similar programs offered at secondary or post-secondary levels. Please refer to the College catalog or see the Registrar at your home campus for specific information or questions related to transfer of general education credits.

Graduation

Certification requirements for students seeking a degree include:

- Successful completion of all courses within program certification requirements at a minimum cumulative grade point average of 2.00.
- Successful completion of the required number of credits.
- Completion of at least 15 degree credits as a regular student at Ivy Tech, and not through test-out or other means of advanced placement.
- Satisfaction of all financial obligations due the College.
- Satisfaction of program accreditation standards that may have additional requirements.

Student Rights and Responsibilities

Students are strongly encouraged to read and familiarize themselves with both of these documents.
Student Grievance Process

The student grievance process provides the College an appropriate mechanism to deal with violations of student rules of conduct and conversely allows a student with a disagreement to grieve against a College employee’s decision affecting that student. The College encourages students to resolve their complaints informally. The informal grievance procedures are designed to accomplish a quick resolution that is most expeditious and effective. Whenever the informal process does not result in a satisfactory resolution, the College formal grievance procedure is also available.

In addition, the grade appeal process provides a mechanism for review when a student believes the final grade he or she received in a course is inaccurate. As with the student grievance process, this procedure encourages students to first attempt to resolve the appeal informally, beginning with the faculty member who issued the course grade.

Please refer to the Code of Student Rights and Responsibilities for a full description of grievance and grade appeal procedures.

Student Disciplinary System/Student Code of Conduct

College Rules
All Ivy Tech students are expected to abide by the College rules of conduct. Students are subject to College jurisdiction while enrolled at Ivy Tech. The College reserves the right to take disciplinary action against any student whose conduct, in the opinion of Ivy Tech representatives, is not in the best interests of the student, other students, or the College. A full description of the student disciplinary system may be found in the Code of Student Rights and Responsibilities.

Guidelines for Professional Conduct in Clinical Settings
Expectations for student behavior in clinical settings are governed by clinical agency affiliation agreements. These guidelines are consistent with Ivy Tech Community College policies for student conduct and are subject to the Student Disciplinary System as described in the Code of Student Rights and Responsibilities.

Guidelines for Campus/Externship Professional Conduct
PURPOSE: Whether a student is in the classroom, lab, or externship, it is expected the student will conduct themselves in a manner befitting a healthcare professional. The
attributes and expectations of a medical assistant professional are discussed throughout the curriculum. In certain courses, evaluation of the student's professionalism is a part of the final course grade. Students will receive additional information regarding the Program’s expectations of professionalism, specifically, while on campus, in certain courses where they can be demonstrated, modeled and mentored by course instructors.

Additionally, the Program Chair and instructors believe strongly in students and graduates associating themselves with a professional organization committed to the medical assisting profession. One such organization is the American Association of Medical Assistants (AAMA). Refer to Appendices B and C to read the AAMA’s code of ethics and the medical assistant creed; both of which further illustrate and support the importance of professionalism.

The information presented here to students, is to ensure students recognize the many guidelines for professional conduct that must govern their behavior and decisions, when engaged in any aspect of patient care. Even as a student in training, you must ensure that patients assigned to you receive appropriate attention and care. It must be provided in a timely fashion. Additionally, it must be in accordance with professional standards for students and respectful of the confidentiality of information provided to you as a part of your externship experience.

Although you may consider yourself to be in a learning mode, patient lives are at stake. Their safety and security is a top priority. Additionally, the quality and reputation of the College rests upon the performance of our students. Read the following with great care, and count on it to serve as your guide. Realize that if these guidelines are not followed, continued participation in the training may be jeopardized. Our ultimate goal is to help you succeed. Faculty members are here to assist you, and they count on you to take these responsibilities seriously. If you have questions related to any of this information, please discuss them with the Program Chair.

As a student, you are held accountable for the rights and responsibilities as established in the Ivy Tech Student Handbook as well as practices of safe, professional and ethical conduct as outlined in this document. Record of incidences will be maintained by the Program Chair and will have a collective effect until the point of graduation.

Externship affiliating agencies have the right to prohibit students from participating in externship experiences based on unprofessional behavior. If a student is excluded from participating in learning experiences at an externship site, the student may not be able to complete course and program requirements, resulting in a failing grade for the course and possible removal from the program.

Expectations of professional conduct into two groups, which are outlined on the following pages. All are critical. Follow-up actions for non-compliance reflect courses of action that would be similar for a professional in a work setting. These actions are listed at the end of each category.
Major Compliance Issues and Appropriate Measures for Patient Care in a Health Setting

The following thirteen points are critical to the successful training and employment of health care professionals and should be followed from the onset of training and referenced as models for behavior to be continued throughout one’s career:

1. You must comply with Indiana State law both on campus and at off-campus locations. This includes, but is not limited to interactions with clients, patients and their families, faculty, peers and personnel of affliating agencies.

2. You must refrain from consuming, being under the influence of, or possessing intoxicating beverages or unauthorized prescription or non-prescription drugs on College property or at the clinical sites. If suspected of being under the influence in the clinical area, you must submit to a serum and/or urine test at your own expense. Results of the tests must be released to the College. Refusal to comply would result in removal from the clinical area and possible recommendation for dismissal pending a conference with faculty regarding professional conduct expectations.

3. You will adhere to state and federal confidentiality laws, including but not limited to HIPAA and clinical affiliate confidentiality policies and procedures. You will maintain confidentiality about all aspects of the clinical experience, this includes confidentiality for all patients, fellow students, clinical affiliate employees, physicians, and operations of the clinical affiliating agency. If there is a situation that arises that requires disclosure of information by law, you must seek out guidance from your clinical faculty member or the Dean of the School of Health Sciences before proceeding with that disclosure.
   a) You will only discuss confidential information in secure and appropriate locations and with those individuals who have a need/right to know.
   b) You will not remove or photocopy any part of the patient/client or clinical records.
   c) You will not use any patient identifiers, as defined by HIPAA, in written assignments.
   d) You will destroy any notes you have taken to enable you to provide care for your patient according to the clinical affiliate policy and will not carry those notes outside of the clinical agency if they contain any patient identifiers.
   e) You are expected to follow guidelines in this Student Handbook with regard to social media, cell phones, email or other electronic media.

4. You will follow guidelines regarding disruptive behavior, sexual harassment and discrimination activities and will exhibit appropriate physical, verbal, and nonverbal behavior towards patients, families, or personnel in cooperating agencies.
5. You will not falsify any component of the written or oral patient/client record.

6. You will exhibit behaviors that respect the dignity and rights of the patient/client regardless of socioeconomic status, personal attributes, or nature of health problem.

7. You must provide for patient safety at all times, including, but not limited to adherence to Standard Precaution Guidelines, safety rules and regulations, use of safety equipment and following written protocol for all diagnostic procedures and policies in the clinical setting.

8. You will not abandon or neglect patients/clients requiring health care.

9. You will not leave the assigned clinical unit during assigned clinical hours without permission and without providing for safe patient hand-off.

10. You will not perform any technique or procedure for which you are unprepared by education or experience and/or without faculty approval.

11. You will guard against theft, abuse, misuse, or destruction of personal property, College property or property located on the College property or clinical site.

12. You will not possess firearms and other weapons, dangerous chemicals, or any explosives or explosive device on College property or at any College-sponsored activity held elsewhere including clinical practicum sites.

13. You will not cheat on papers, tests, or other academic works including clinical practicum assignments.

In the Event of Non-compliance with Expectations Listed Above

Because these expectations cannot be compromised, non-compliance is a serious matter. Students are encouraged to address any related questions prior to the start of the term, or on any given day that a question arises, by seeking counsel of faculty.

ACTIONS: If non-compliance in any of these areas becomes evident, a written status report or other documentation will be prepared and the student will be required to meet with the Chair and/or Dean of the School of Health Sciences. The Chair and/or Dean will further investigate and make a recommendation regarding action taken by the School of Health Sciences. Recommended actions may include: continued enrollment in the clinical course with additional requirements stipulated and an appropriate reduction in the clinical grade as determined by the clinical evaluation tool.
administrative withdrawal and failure of the clinical course, a change in program status up through and including permanent removal from the program. In the event a student is permanently dismissed from one program, he/she may not apply for admission to a Medical Assisting program at any other Ivy Tech Community College campus. In addition, further disciplinary action may be recommended according to College policy. Pending outcome of the recommendations, the student will not be permitted to engage in patient care until approved to do so by the Dean of the School of Health Sciences. Further, if allowed to continue, the student will be required to complete remediation as prescribed by the Chair and/or Dean prior to re-enrolling in any clinical course.

**General Protocol and Guidelines**

1. You are expected to follow program guidelines regarding the attendance policy and notification of intended absence. You must follow rules/regulations pertaining to the occupational area and/or clinical affiliate policy.

2. You must refrain from smoking or using other tobacco products in restricted areas.

3. You will not solicit, vend or distribute literature, written or printed material in the clinical setting without proper authorization.

4. You will not accept gratuities from patients; this includes both monetary and non-monetary gifts.

**In the Event of Non-compliance with Expectations Listed Above**

*These four items reflect appropriate responses as related to professional protocol and guidelines that are expected while in the student role and once employed in a health care field.*

**ACTION:** Any behavior not meeting the expectations listed above would result in a written status warning report for the first incident and will impact the clinical grade. The student would be asked to acknowledge receipt of the warning, and should take the initiative to review what is expected and modify behavior accordingly.

In the event that any subsequent infraction(s) occur(s) involving one of the Group II expectations and/or a previous infraction of a Group I expectation, a written status report or other documentation will be prepared and the student will be required to meet with the Chair and/or Dean of the School of Health Sciences. The Chair and/or Dean will further investigate and make a recommendation regarding action taken by the School of Health Sciences. Recommended actions may include: continued enrollment in the clinical course with additional requirements stipulated and an appropriate reduction in the clinical grade as determined by the clinical evaluation tool,
administrative withdrawal and failure of the clinical course, a change in program status up through and including permanent removal from the program. In the event a student is permanently dismissed from one program, he/she may not apply for admission to a Medical Assisting program at any other Ivy Tech Community College campus. In addition, further disciplinary action may be recommended according to College policy. Pending outcome of the recommendations, the student will not be permitted to engage in patient care until approved to do so by the Dean of the School of Health Sciences. Further, if allowed to continue, the student will be required to complete remediation as prescribed by the Chair and/or Dean prior to re-enrolling in any clinical course.
Additional Professional Conduct Expectations Specific to Those who Administer Medications

1. A potential medication error that is prevented by the clinical faculty member will still be considered a medication error on the part of the student.

2. You will ensure that medications are administered on time and in accordance with patient care plans.

3. You will follow correct medication procedure as summarized in the “Six Rights” listed below:

   SIX RIGHTS
   ✓ Right Patient
   ✓ Right Medication
   ✓ Right Dose
   ✓ Right Time/Date
   ✓ Right Route
   ✓ Right Document

4. You will be prepared to verbalize knowledge of medications and the relationship to the patient.

5. You will calculate proper medication dosage or safe dosage in the clinical area.

6. You will report any medication error to your clinical faculty member or clinical agency staff nurse immediately in order that appropriate action may be taken to care for the involved patient and so that appropriate clinical agency policies are followed.

In the Event of Non-compliance with Expectations Listed Above

Medications errors are a leading cause of patient injury and must be taken seriously. Consistent with current practice guidelines, the school supports the initial stance of conducting a root-cause analysis to help prevent future errors. In the event of an error, the student will be expected to meet with the faculty member to determine strategies to prevent future errors and will be expected to participate as requested in any root-cause analysis conducted by the clinical agency. However, repeated errors constitute a failure to demonstrate competence and safety in this important component of patient care and will be subject to actions that will impact the student’s status in the program.
**ACTION:** Every medication error will be documented on a student status form and will impact the clinical grade. The student will be expected to acknowledge receipt of this feedback, review appropriate procedures, address any related questions with faculty, and initiate precautionary measures to make certain that it does not happen again. In the event that there is more than one documented student status form for medication-related errors, occurring at any point throughout the student’s enrollment in the program, a written status report or other documentation will be prepared and the student will be required to meet with the Chair and/or Dean of the School of Health Sciences. The Chair and/or Dean will further investigate and make a recommendation regarding action taken by the School of Health Sciences. Recommended actions may include: continued enrollment in the clinical course with additional requirements stipulated and an appropriate reduction in the clinical grade as determined by the clinical evaluation tool, administrative withdrawal and failure of the clinical course, a change in program status up through and including permanent removal from the program. In the event a student is permanently dismissed from one program, he/she may not apply for admission to a Medical Assisting program at any other Ivy Tech Community College campus. In addition, further disciplinary action may be recommended according to College policy. Pending outcome of the recommendations, the student will not be permitted to engage in patient care until approved to do so by the Dean of the School of Health Sciences. Further, if allowed to continue, the student will be required to complete remediation as prescribed by the Chair and/or Dean prior to re-enrolling in any clinical course and subsequent infractions will be subject to the same process as described above.

---

**Academic Honesty Statement**

The College is committed to academic integrity in all its practices. The faculty value intellectual integrity and a high standard of academic conduct. Activities that violate academic integrity undermine the quality and diminish the value of educational achievement.

Cheating on papers, tests or other academic works is a violation of College rules. No student shall engage in behavior that, in the judgment of the instructor of the class, may be construed as cheating. This may include, but is not limited to, plagiarism or other forms of academic dishonesty such as the acquisition without permission of tests or other academic materials and/or distribution of these materials and other academic work. This includes students who aid and abet as well as those who attempt such behavior.
Grading Practices

The Medical Assisting Program will use the following grading scale:

93-100   A
85-92    B
79-84    C
75-78    D
0 – 74   F

Evaluation of Student Learning

Methods of Evaluation in Courses
Each course syllabus in the Medical Assisting Program provides an overview of the assigned activities and exams designed to evaluate student learning in the cognitive, psychomotor, and affective learning domains. The methods used for this evaluation may vary from course to course.

General Education Outcomes Assessment
Graduates’ skills in several general education areas are assessed to determine whether they meet the learning outcomes defined for general education and whether their performance with respect to these outcomes has improved during their period of enrollment at the College.

The College uses the Collegiate Assessment of Academic Proficiency (CAAP) exam to identify skills in Math, English, Scientific Inquiry and Critical Thinking. CAAP is used at many colleges around the country. Each associate degree graduate will take two of the four modules possible. Tests will be given in the capstone course. Capstone courses represent the culminating experiences in the student’s program.

The College places a strong emphasis on student learning outcomes as a focus for planning and institutional improvement. Students will receive a copy of their CAAP scores; in addition, students who score at or above the national mean will receive a “certificate of achievement” for each module. Certificates of achievement may be useful to a student in building their resume or portfolio.

*MEAS 260 Clinical Externship has been designated as the capstone course in the Medical Assisting program. As such, the Technical Certificate students are required to take the CAAP exam.
Technical Outcomes Assessment
The primary purpose of technical outcomes assessment is to determine the Ivy Tech graduates’ mastery of the professional knowledge, comprehension, and skills required for the field the students are preparing to enter. Technical outcomes assessment also provides statewide curriculum committees with necessary information regarding the currency of the curriculum and effectiveness of student learning.

The Medical Assisting Technical Certificate program utilizes the American Association of Medical Assistants CMA/AAMA certification exam as their technical outcomes assessment.

Certification/Licensure
In the state of Indiana, certification is not required for medical assistants. However, it is highly recommend that students complete CMA (AAMA) certification examination for which they are eligible following successful completion of the Medical Assisting Technical Certificate program. Students are required as a part of the MEAS 260 Medical Assisting Externship course objectives to complete and submit the application to take the exam.

Ivy Tech cannot guarantee any student will pass a certification exam. Your success will be determined by several factors beyond the instruction you are given in the classroom, including your test-taking skills, your willingness to study outside of class, and your satisfactory completion of appropriate practice exams. Certification exam questions are drawn from databases of hundreds of possible questions; therefore, a thorough understanding of the subject matter is required.

Professional certification signifies a level of expertise in your field. It gives you, and your employer, confidence in your job skills. Additionally, it is a professional credential that is recognized in all 50 states without the need for reciprocity. Students are encouraged to access the American Association of Medical Assistants website at www.aama-ntl.org to learn more about the benefits of this highly-regarded, professional credential.

Positive findings on a criminal background check may impact an individual’s ability to obtain certification or to gain employment.

Student Requirements Associated with Clinical Affiliation Agreements
Student clinical/externship experiences are arranged by program faculty and affiliation agreements obtained with clinical affiliating agencies. These agreements outline the responsibilities and privileges of both parties. In an off-campus setting, it is the policy of the College that faculty and students shall conform to all policies of the affiliating agency, including drug screening, criminal background checks, physical examination, immunization records, tuberculosis screening, and certification in basic life support.
Criminal Background Checks and Drug Screening

Purpose

Requiring criminal background checks and drug screenings ensures students meet the same standards as health care facility employees. This will also provide consistency for Ivy Tech School of Health Sciences and School of Nursing programs. Health care facilities are obligated to document that any individual authorized to provide such care does not have a criminal history of mistreatment, neglect, violence, defrauding the public, or otherwise taking advantage of another person and has no record of illegal use of pharmaceuticals or use of any illegal substances.

Organizational Scope or Audience

This policy applies to all students who will have direct patient contact within a health care facility or laboratory, or other setting where health care is provided, as well as students who do not have direct patient contact but engage in practice-based learning within a setting where health care is provided.

Definitions

Drug Screening: technical analysis of a biological specimen - for example urine, hair, blood, sweat, or oral fluid / saliva - to determine the presence or absence of specified parent drugs or their metabolites.

Practice-based learning: as applicable to this policy, any course of study in which the student may be assigned to a healthcare or practice laboratory setting to meet course objectives. This includes, but is not limited to, assignment in any setting where a student provides direct patient care or patient care services, has direct contact with patients or their families in an observational role, has access to patients’ health records, or is performing invasive healthcare procedures in a campus laboratory setting.

Policy

Criminal background checks and drug screenings will be required for all currently enrolled clinical students and newly admitted students in School of Health Sciences and School of Nursing programs. Completion of a criminal background check and drug screening are required for admission and/or clinical placement in Health and Nursing programs. The criminal background check and drug screening may be done either before enrollment in the professional courses or just prior to the first day of clinical or externship as specified by the program. Additional criminal background checks and/or drug screenings will be required in programs for students enrolled in clinical courses more than 12 months.
Students who are enrolled in courses for credit or non-credit, but who are not in a degree-seeking program, may be exempt from the drug testing and background check requirements in this policy. Further, additional or different requirements may apply to students in any program for which rules or regulations external to College policy exist.

Students who are not continuously enrolled in a program until completion may be required to complete additional checks upon re-entry to a program or admission to a different program in the School of Health Sciences or School of Nursing. Clinical sites or the College may request additional background checks or drug screenings at their discretion.

Students who are denied clinical placement or who are withdrawn from enrollment in a clinical course due to clinical site refusal to accept students with positive findings on criminal background checks or drug screenings, may reapply to the same or different School of Health Sciences or School of Nursing program the next semester, but will need to comply with additional criminal background checks or drug screenings as required. College program admission and progression policies will apply. If a student is denied placement for clinical at one site, up to two more attempts will be made to place the student at other clinical sites if other sites are available.

**Procedure**

The student is responsible for completing the online processes and other required paperwork, paying for the criminal background check and drug screening, working with the company providing the criminal background check and drug screening for any follow-up information or testing that may be required, and monitoring the results of the criminal background check and drug screening. By participating in the required criminal background check and drug screening, students are giving the College permission to release information as needed to the clinical affiliates. The College will provide clinical sites an assurance that background checks and drug screenings will be completed for every student. The student, the College, and clinical sites will have access to the secure web-based results.

The student will initiate the required background check and drug screening with the company of the College's choice by the due date designated by the program. Students who refuse to comply with the background check and drug screening will not be eligible to enroll in clinical courses, and therefore will not be eligible to enroll, progress, and/or graduate from the program.

The background check will include the following elements (additional elements may be added if required by the clinical site):

- County, state, and federal criminal record searches of all places of principal residences for the past 7 years (or since age 18, if less than 25 years old). Records will be verified against all known names and addresses as revealed on the social security report.
National criminal history database that includes 50-state sex offender and Office of Foreign Assets Control (OFAC) List of Specially Designated Nationals (SDN).

- Office of Inspector General (OIG)/ General Services Administration (GSA) Sanction Reports, United States Treasury, applicable state exclusion list
- Social security verification and residency report
- Maiden name and alias report

The drug screening will include the following elements (additional elements may be added if required by the clinical site) Note: examples of common names for drugs or illegal substances are listed in parentheses.

- Marijuana (cannabis, weed, hemp)
- Cocaine (coke, snow, blow)
- Opiates (morphine, codeine)
- Amphetamines and methamphetamines (Ritalin, Ecstasy, speed, meth)
- Phencyclidine (PCP, angel dust)
- Propoxyphene (Darvon)
- Barbiturates (Valium, Librium)
- Methadone (oxycodone, hydrocodone, Vicodin)
- Benzodiazepines (Versed, Dalmane, Restoril, Xanax)
- Methaqualone (Quaalude, Sopor)

The student will have access to findings of the criminal background check and drug screening, via the results posted on the secure web site, as required by the Fair Credit and Reporting Act. The student has both the responsibility and the right to challenge any information in the findings that the student believes to be erroneous with the company providing the background check and drug screening. The student is responsible to present documentation of any clarification of the findings to the College, and the College may share that documentation with the clinical site(s).

The student may reapply to the same program or another program in the School of Health Sciences or the School of Nursing the next semester. The student will need to complete the criminal background test again if s/he is readmitted. College program admission and progression policies will apply.

**Disclaimers**

- Completion of a criminal background check and drug screening for a Health Sciences or Nursing program does not ensure admission to or continued enrollment in any program.
- Completion of a criminal background check and drug screening for a Health Sciences or Nursing program does not ensure eligibility for licensure, credentialing, or future employment. Additional criminal background checks and/or drug screenings may be required for licensure, credentialing, or employment.
Clinical affiliates can establish more stringent standards for criminal background checks and/or drug screenings than those required by the College, and students will be required to meet those standards.

Clinical affiliates can conduct additional background checks and drug screenings (including random drug screenings during clinical) at their discretion.

Completion of background checks and/or drug screenings from other vendors, such as those required by current employers of the students, may not be used in lieu of the College requirements.

If a student is found to be ineligible for clinical placement at any time during the program, the student will be withdrawn from the clinical course and any co-requisite courses pending resolution of the situation.

Protection of confidential information from the background checks and drug screenings

Information obtained from the result of student background checks and drug screenings will be treated as confidential information, and protected from unauthorized access. Authorization to view the results will be limited to individuals who make clinical assignments and designated individuals at clinical sites requesting the information for students placed at the sites. Release of the results of criminal background checks and drug screenings to clinical sites is given for the purpose of clinical placement. In the event that a student is prevented from enrolling in and/or completing a clinical course or courses due to the results of the drug screen and/or criminal history background check, a printed copy of the results and a memorandum summarizing the rationale and action(s) taken at that time will be maintained in a secure (locked file cabinet) School of Health Sciences and School of Nursing file for seven (7) years.

Procedures for Determining Eligibility for Externship Placement

Eligibility for Externship Experiences with Affiliating Clinical Agencies

Clinical sites have the right to refuse any student for externship placement. Policy at externship sites may vary in whether or not students with particular positive findings on the background check will be allowed to attend externships. In the event there are positive findings on any portion of the criminal background check, a primary externship site will be notified and requested to make a decision on whether or not the student will be allowed to complete an externship at the site, in light of the specific positive findings on the criminal background check. If the externship site will not allow the student to participate in the externship at that site, the program chair will contact up to two additional externship sites offering the same type of externship experience, if available, to attempt to place the student. If these attempts do not result in an externship site placement for the student, the student will be notified that s/he may not enroll in externship courses and any co-requisite courses. In most cases, this will mean that the student will not be able to progress in the program, and will therefore not be able to complete the courses required for graduation. Ineligibility must be documented.
Physical Examination and Health Records
A physical examination is required not more than one year prior to beginning certification pathway courses in order to identify health status and accommodation needs. The student’s health care provider must complete a physical assessment to determine if the student is capable of undertaking the Essential Functions of Medical Assisting Students (included on the following pages). Records of current immunization status and tuberculosis screening are required by affiliating clinical institutions and the Indiana State Department of Health. Submission of the health records occurs after the student is selected for admission, but prior to the start of the first clinical course. Students will be required to keep immunizations and tuberculosis screening current and to provide the School of Health Sciences with updated health records as necessary throughout their enrollment in the program.

Essential Functions of Medical Assisting Students

Qualified applicants are expected to meet all admission criteria and matriculating students are expected to meet all progression criteria, as well as these essential functions. **Students with documented need for accommodations are to meet with the campus Disabilities Support Services Representative.**

Focus attention on task
Monitor own emotions
Handle strong emotions (e.g., grief) | C

Note: Students with disabilities requiring accommodations must meet with the College Disabilities Support staff.

Universal Standard Precautions

According to the Universal Standards Rule 410 IAC 1-4 under Public Law 123-1988: "An employer shall provide training and the necessary equipment to each employee and student trainee who has duties that require the employee to have direct contact with blood or body fluids in the scope of the employee's employment." This training must include instruction in the procedures "Universal Standards" adopted by the Indiana State Department of Health. Because students in the Medical Assisting program may have direct contact with blood or other body fluids, the program is required to provide annual training in Universal Standards to comply with agency affiliation agreements.

Caring for patients with communicable diseases and opportunistic parasites increases the possibility of student susceptibility for acquiring these infections/infestations. All students who are enrolled in clinical or laboratory courses accept responsibility for consistent and correct use of Universal Standard Precautions at all times.

Confidentiality

As part of their affiliation with clinical agencies, students enrolled in clinical/externship courses are required to comply with Federal HIPAA regulations, state regulations, and facility policies with regard to privacy of patient information. All information, which is learned about a patient, is considered to be confidential information. Confidential information may NOT be discussed in any public place – such as the student lounge, the halls of the hospital or school, hospital cafeteria or any similar public place.

Written information, such as care plans, physician’s notes, growth and development papers, etc. pertaining to a patient, or any written information must be guarded as confidential. Any written information should contain only the patient’s initials and never the patient’s name or any other identifying information.

DO NOT DISCUSS CLINICAL EXPERIENCES in any public place. Confidentiality of patients, staff, faculty and students is to be maintained at all times. Patient information or clinical situations should never be discussed in public places or on social networking sites even if the patient is not referred to by name.
Photocopying of any patient records or removal of patient records from the clinical facility is expressly forbidden.

Photography of any patient or clinical situation is strictly prohibited.

*Violations of privacy regulations/policies may result in immediate dismissal from the program as outline in Guidelines for Professional Conduct, as well as civil and criminal penalties.*

**Social Networking and Cell Phone Guidelines**

Students shall not use online social networking to harass, threaten or discriminate against other students, faculty, staff or any member of the public.

Text, photos, e-mails or videos that are demeaning or insulting to others may not be used/posted.

Personal information about students, faculty, staff or clinical sites may not be shared on networking sites without written permission from all parties involved.

Computers and cell phones are not to be used during class or clinical time for social networking, texting, e-mailing or other recreational use.

Students should be aware that information posted on these sites that violates the Guidelines for Professional Conduct outline in this handbook, may result in disciplinary action up to and including expulsion from the program. Furthermore, such violations can place the student at risk for civil and criminal penalties.
Medical Assisting Program Curriculum

Technical Certificate Program – 45-47 credits
Students completing the Technical Certificate program must complete the entire sequence of courses in order to be eligible to apply for the CMA (AAMA) certification exam. **NOTE: The number of credits required for completion is based on students who are program-ready and does not include non-academic skills courses.**

**General Education** 7-9 Credits
IVYT 1XX  Student Success Elective  1-3 credits
XXXX XXX  Humanities/Social & Behavioral Sciences Elective  3 credits
ENGL 111  English Composition  3 credits
or or
COMM 101  Fundamentals of Public Speaking
or or
COMM 102  Introduction to Interpersonal Communication

**Professional-Technical** 3 Credits
HLHS 101  Medical Terminology  3 credits

**Concentration** 35 Credits
APHY 101  Anatomy & Physiology I  3 credits
APHY 102  Anatomy & Physiology II  3 credits
MEAS 107  Administrative I  3 credits
MEAS 108  Administrative II  3 credits
MEAS 137  Medical Insurance & Basic Coding  3 credits
MEAS 207  Integrated Medical Office Systems  3 credits
MEAS 218  Pharmacology  3 credits
MEAS 219  Medical Assisting Laboratory Techniques  3 credits
MEAS 238  Clinical I  3 credits
MEAS 239  Clinical II  3 credits
MEAS 260  Medical Assisting Administrative and Clinical Externship  5 credits

**Special Note Regarding Externship Courses**
Students are enrolled in the MEAS 260 course by approval of the Program Chair. The total number of hours students are required to spend at their assigned externship site is 200. Students **receive no compensation** for their externship hours.
Educational Curriculum/Competencies
See Appendix A of this handbook. This document is prepared by the Medical Assisting Education Review Board (MAERB), and the Medical Assisting program incorporates the knowledge base, skills, and behavior competencies into the curriculum.

Course Descriptions
Official college-wide Course Outlines of Record (COR) are available on the College Web site. In addition to course number, title, credit and contact hours, the COR includes the prerequisite and co-requisite requirements, the catalog description, major learning objectives, and a topics list.

MEAS Program Course Contact Hours

Lecture: 1 credit = 1 contact hr  Lab: 1 credit = 2 contact hrs  Externship: 1 credit = 5 contact hrs

## Associate of Applied Science degree in Medical Assisting

The Lafayette campus also offers an Associate of Applied Science degree (AAS) in Medical Assisting. The AAS degree currently requires a total of 60-62 credits, consisting of an additional 15 credits above the required 45 for the Technical Certificate program. The additional credits required includes: ENGL 111 English Composition, a MATH 1XX course; MEAS 242 Disease Conditions, and two additional courses selected from a previously determined list of program elective courses. Students who are interested in completing the AAS degree should make an appointment with the Medical Assisting Program Chair to develop an academic plan.

Students do not have to complete the AAS degree in order to apply to take the CMA (AAMA) certification exam; only successful completion of the Technical Certificate program is required to apply to take the exam.
According to the U.S. Department of Labor, individuals enrolled in health care career programs can anticipate solid growth in health care related field across a broad spectrum of professions. Below is a brief table summarizing some potential occupations within the health care field individuals might consider during their career exploration.

Core Curriculum for Medical Assistants

The following document was prepared by the Medical Assisting Education Review Board (MAERB) and has been copied from the MAERB’s website.

Medical Assisting Education Review Board (MAERB)
2008 Curriculum Plan

Foundations for Clinical Practice

Medical assistants graduating from programs accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) will demonstrate critical thinking based on knowledge of academic subject matter required for competence in the profession. They will incorporate the cognitive knowledge in performance of the psychomotor and affective domains in their practice as medical assistants in providing patient care.

Appendix B

American Association of Medical Assistants Code of Ethics*

The Medical Assisting Code of Ethics of the AAMA sets forth principles of ethical and moral conduct as they relate to the medical profession and the particular practice of medical assisting.

Members of AAMA dedicated to the conscientious pursuit of their profession, and thus desiring to merit the high regard of the entire medical profession and the respect of the general public which they serve, do pledge themselves to strive always to:

1. Render service with full respect for the dignity of humanity.
2. Respect confidential information obtained through employment unless legally authorized or required by responsible performance of duty to divulge such information.
3. Uphold the honor and high principles of the profession and accept its disciplines.
4. Seek to continually improve the knowledge and skills of medical assistants for the benefit of patients and professional colleagues.
5. Participate in additional service activities aimed toward improving the health and well-being of the community.

Appendix C

American Association of Medical Assistants Creed*

The Medical Assisting Creed of the AAMA sets forth medical assisting statements of belief:

- I believe in the principles and purposes of the profession of medical assisting.
- I endeavor to be more effective.
- I aspire to render greater service.
- I protect the confidence entrusted to me.
- I am dedicated to the care and well-being of all people.
- I am loyal to my employer.
- I am true to the ethics of my profession.
- I am strengthened by compassion, courage and faith.

Student Name__________________________________________________________

Date of Program Entry______________
Students are required to comply with Federal HIPAA regulations, state regulations, and facility policies with regard to privacy of patient information.

All information that you learn about a patient is considered to be confidential information. Confidential information may NOT be discussed in any public place, such as the student lounge, the halls of the hospital or school, hospital cafeteria or any similar public place. This includes all social media formats.

Written information, such as care plans, practice nurse’s notes, growth and development papers, etc. pertaining to a patient, or any written information must be guarded as confidential. Any written information should never contain any of the patient’s name or any other identifying information.

Confidentiality extends to any and all operations of the clinical affiliating agency. DO NOT DISCUSS ANY HOSPITAL EXPERIENCES in any public place, whether or not you refer to patient information. This includes discussion of clinical experiences in any social media format.

Photocopying of any client records or removal of client records from the clinical facility is expressly forbidden.

I hereby acknowledge that I have received instruction related to Federal HIPAA regulations and patient confidentiality. I agree to comply with all Federal HIPAA regulations, state regulations, and facility policies with regard to privacy of patient information. I understand that violations of privacy regulations/policies may result in immediate dismissal from the program, as well as civil and criminal penalties.

I understand that the possibility exists that a record of certain offenses may result in a graduate being denied certification or licensure as a health practitioner in the State of Indiana. These offenses include but are not limited to being convicted of a crime or disciplinary action taken on previous licenses or certifications.

Ivy Tech Community College has informed me that if I have a record of any criminal offenses or prior actions related to certification or licensure, the Indiana Professional Licensing Agency may choose to deny me certification or licensure, even if I satisfactorily complete Ivy Tech Community College’s required curriculum.

STUDENT VERIFICATION OF TRAINING IN UNIVERSAL AND STANDARD PRECAUTIONS
IVY TECH COMMUNITY COLLEGE SCHOOL OF HEALTH SCIENCES

According to the Universal Standards Rule 410 IAC 1-4 under Public Law 123-1988: "An employer shall provide training and the necessary equipment to each employee and student trainee who has duties that require the employee to have direct contact with blood or body fluids in the scope of the employee's employment." This training must include instruction in the procedures "Universal Standards" adopted by the Indiana State Board of Health. Because students in the Medical Assisting program may have direct contact with blood or other body fluids, the Medical Assisting Program is required to provide annual training in Universal Standards. This form will be retained in the Medical Assisting Program's office as documentation of training in Universal/Standard Precautions.

I realize that instruction may require that I safely and accurately perform invasive procedures such as injections/drawing blood/starting intravenous fluids during the laboratory and clinical components of my program. I recognize the importance of practice under faculty supervision in the learning laboratory as well as in the clinical environment. Likewise, I am aware of the dangers inherent with giving and receiving injections. I acknowledge the need for 100% use of Universal and Standard Precautions and sterile technique when performing parenteral procedures.

Therefore, my signature below verifies that I have had training and instruction on Universal and Standard Precautions and that I accept responsibility for consistent application of Universal and Standard Precautions, consistent application of sterile techniques, handling syringes and other sharp equipment only as instructed, and practicing skills in the lab setting only under the supervision of faculty.

Student's Printed Name ________________________________  
Student Signature ________________________________ Date

Further, I accept responsibility for allowing classmates in my program, under faculty supervision in the learning laboratory, to practice parenteral procedures on me. I understand that this is not a mandatory requirement.

Student’s Printed Name ________________________________

Medical Assisting Handbook 2014/2015
PERMISSION TO DISCLOSE PERSONAL, CONFIDENTIAL INFORMATION

I do hereby grant permission to authorized persons in Ivy Tech Community College, including School of Health Sciences Program faculty, to comply with requests for information for evaluative purposes by others acting on my behalf in such matters as: clinical/externship placement, employment references, admission to other colleges, and/or securing financial aid, scholarships, honors, or awards.

I understand and agree that enrollment in the Medical Assisting program requires my participation in clinical/externship educational activities at certain health care provider locations, including but not limited to hospitals, nursing homes, physical rehabilitation centers and other health clinics. I further understand that such clinical/externship locations require proof of immunity to certain infectious illness, tuberculosis screening, and documentation that I am capable of performing essential functions, criminal background checks, and drug screening. Consequently, I hereby authorize Ivy Tech Community College to disclose such personal protected information that it may possess, whether provided directly by myself or my personal health care provider, to such clinical/externship locations as may be necessary for my participation in said health care related instructional program.

Finally, I understand that this authorization extends indefinitely and may be revoked at any time by providing written and signed notice to Ivy Tech Community College. I understand that refusal to authorize release of this information may result in my inability to participate in clinical experiences and may result in withdrawal from the nursing program.
