As research continues to change the face of modern medicine, more sophisticated tests allow for more accurate and rapid diagnoses. Medical Laboratory Technology (MLT) has become a technologically complex field requiring specific knowledge and skills. The MLT program at Ivy Tech will train you to proficiently perform the duties required in a Clinical Laboratory. This two-year Associate in Applied Science degree program will prepare you theoretically and technically for the procedures you will be performing.

The Medical Laboratory Technology program is a selective admission program. When you apply to the College, you will be accepted into Healthcare Support with a concentration in Medical Laboratory Technology while you complete the prerequisite requirements. The Medical Laboratory Technology program accepts a limited number of students each year and there is a separate application process.

Degrees & Certificates Offered (Wabash Valley Region):
Associate of Applied Science (AAS)
