

# NURSING(ASN) PRACTICAL NURSING(PN)

The Associate of Science in Nursing (ASN) program is designed to accommodate two groups of students: those who are entering a nursing program for the first time and those Licensed Practical Nurses or certified Paramedics seeking educational mobility to the associate-degree level. As a graduate of the ASN Program, you will be eligible to apply to take the NCLEX-RN examination to become a Registered Nurse. You may seek immediate employment as a Nurse or choose to transfer your credits to a four-year institution offering a baccalaureate degree.

The Licensed Practical Nurse (LPN) is an integral part of the health-care team. The Practical Nursing program leads to a Technical Certificate and can be completed in approximately one year. The accredited program will prepare you to care for patients in a variety of health-care settings, such as hospitals, convalescent centers, clinics, home care and physician offices. Graduates are eligible to apply to the state licensure exam (NCLEX-PN) to become a Licensed Practical Nurse.
