

PRE-ENGINEERING

This comprehensive two-year program prepares students for entrance into professional engineering schools. It is designed to extend the scope of student undergraduate education by avoiding premature specialization. Required courses emphasize fundamental knowledge and skills in calculus, geometry, algebra, trigonometry, statistics, dynamics, electrical/mechanical principles, thermodynamics, engineering graphics and design, physics, chemistry, humanities, and the social sciences.

Degrees & Certificates Offered (Evansville Campus):

Associate of Science (AS)

Two-year Associate of Science programs typically contain 40 percent or more general education, with the balance in technical and profession courses. The coursework provides students with a foundation for transfer to a related baccalaureate program at a four-year institution, and equips students with skills for the job market.

Our Graduates

It is anticipated that almost all graduates of the Associate of Science Degree in Engineering program will transfer to a four-year university to continue their education. However, for a number of graduates, the AS degree will be a tool with which they can market themselves to local employers, many of whom have tuition refund programs to support employee education.

Credits from individual Ivy Tech classes transfer to colleges and universities throughout Indiana—and in some cases, entire programs transfer. Whether you are considering a program with a career in mind or want to save money by starting your bachelor's degree at Ivy Tech, transfer options are a great way to get started.
