

## START AN EXCITING CAREER IN SURGICAL TECHNOLOGY

The Surgical Technology program is very demanding but with our high quality of training, you will be prepared to enter the work force in the surgery field, labor and delivery, as a Surgical Assistant, or at Central Sterile Supply. This is a very rewarding career in the Health Science Field. It is not nursing; you do a very specific technical job and work under the RN and Surgeon. Our program requires more than 900 hands-on hours of training where you will spend your time in a real operating room.

The Surgical Technology program is a selective admission program. When you apply to the College, you will be accepted into Healthcare Support with a concentration in Surgical Technology while you complete the prerequisite requirements. The Surgical Technology program accepts a limited number of students each year and there is a separate application process.

- **Students are trained in a state-of-the-art surgical suite or laboratory with replication simulation of general and laparoscopic surgeries.**
- **Students learn and practice sterile technique, instrumentation, counting, organization, prioritization, anticipation, as well as surgical knowledge.**
- **ALL graduates have obtained a 100% pass rate on the Certification Exam and ALL graduates are 100% employed over the past eight (8) years.**
