Certified Clinical Medical Assistant (CCMA) in Partnership with WorkOne

The Clinical Medical Assisting Profession

The Clinical Medical Assisting program is designed to prepare students to work in multiple healthcare settings. Medical assistants with a clinical background perform various clinical tasks to assist doctors including, assisting with the administration of medications and with minor procedures, performing electrocardiogram (EKG) tests, obtaining laboratory specimens for testing, educating patients, and other related tasks. Job opportunities are prevalent within physicians’ offices, clinics, chiropractors’ offices, hospitals and outpatient facilities.

The Clinical Medical Assisting Program

The purpose of the Clinical Medical Assisting program is to prepare students to assist doctors by performing functions related to the clinical aspects of a medical office. This course covers the following key areas and topics:

Education and Certification

- Clinical Medical Assistants should have or be pursuing a high school diploma or GED.
- Students who complete this comprehensive course will be prepared to sit for the National Health career Association (NHA) Certified Clinical Medical Assistant (CCMA) national certification examination. The certification exam is part of the course.
- In addition to facilitating entry-level clinical medical assisting related positions, this course is ideal for students interested in pursuing a future formal Certified Medical Assistant (CMA), Nursing (LPN) or a Nursing (RN) program.
