Medical Assistants are multi-skilled health professionals specifically educated to work in ambulatory settings performing administrative and clinical duties. The practice of medical assisting directly influences the public’s health and well-being, and requires mastery of a complex body of knowledge and specialized skills requiring both formal education and practical experience that serve as standards for entry into the profession.

The Medical Assisting program is a selective program (varies by campus). When you apply to the college, you will be accepted into the undeclared program while you complete the prerequisite requirements. The Medical Assisting program accepts a limited number of students each year and there is a separate application process.

**Degrees & Certificates Offered (Evansville Campus):**
Associate of Applied Science (AAS)
Technical Certificate (TC)

**Typical Careers:**
Certified Medical Assistant (CMA)
Medical Assistant
Insurance Specialist
Medical Transcriptionist

**POINTS OF PRIDE**
- Students are trained to perform the administrative functions of the medical office in our medical office simulation lab. The lab is complete with a fully equipped front office and administration check in/out stations.
- Students are trained to perform clinical functions of the medical office in our six fully equipped office exam rooms.
- Students perform externships at area medical office practices located in Evansville, Tell City, Princeton, Newburgh, Ft. Branch and Vincennes.
- Students have the opportunity to be placed at a variety of medical practices for both administrative and clinical skills, i.e. family medicine, internal medicine, pediatrics, urological, OB/GYN and geriatrics.
- Upon successful completion of the Technical Certificate, students can sit for the CMA (AAMA) Certification exam.
