

# SONOGRAPHY

The Diagnostic Medical Sonography Program offers degrees in ultrasound. Sonographers use high frequency sound waves to produce dynamic images of organs, tissues or blood flow inside the body.

Diagnostic Medical Sonography graduates can work in hospitals, physicians offices, clinics, federal and state health agencies and certain educational institutions. The Associate of Applied Science program includes courses in the following areas: technique, exposure, positioning, protection, physics, patient care and ethics. Clinical practice and supplemental instruction are provided in accredited hospitals and clinics. Upon completion of the ultrasound program requirements, graduates are eligible to apply for registry examinations.

## Degrees & Certificates Offered (Wabash Valley Region):

Associate of Applied Science (AAS) - Diagnostic Medical Sonography/General  
Associate of Applied Science (AAS) - Diagnostic Medical Sonography/Vascular  
Associate of Applied Science (AAS) - Diagnostic Medical Sonography/
