

BENEFITS OF IVY TECH'S HONORS COLLEGE

Personalized Advising & Support

Honors students have access to early academic advising and Honors advisors who can help them prepare to transfer to a baccalaureate program. A small, tight-knit community provides additional support during their time at Ivy Tech. Honors advisors help students every step of the way.

Specialized Curriculum

Honors courses are smaller than average, allowing a greater focus on dialogue, reflection, and critical thinking. Classes are in a live virtual format, so that students can connect with like-minded peers and excellent faculty across the state.

Students also benefit from:

- Chances for research and publication, and summer residential research experiences
- Formal conference presentation opportunities
- Leadership and professional development

Transfer & Career Success

Honors students have been accepted to more than 60 top U.S. universities. This is thanks to:

- Honors-exclusive Transfer and Career & Professional Development Seminars
- Transcripts that highlight honors courses and participation in the Honors College
- Transfer agreements with other Honors Colleges at schools like Ball State, Earlham, and Manchester.

Academic Recognition

We celebrate students who graduate with an Honors Diploma or Honors Certificate with a specialized diploma and Honors stoles at the Commencement Ceremony. High academic achievement is also encouraged through the Presidential Honors College Scholarship, which is awarded to applicants who demonstrate exceptional potential and maintain a high GPA.
