

STUDENT INFORMATION

Students participating in ITEP:

- have the opportunity to pursue one of six Technical Certificates pathways in Industrial Technology, and Associate of Applied Sciences in Industrial Technology and/or an Associate of Applied Science in Advanced Automation and Robotics.
- will be eligible for internship opportunities with area industries as both a high school and college student,
- will have the opportunity to participate in career and academic counseling as well as mentoring opportunities with collegiate and industry personnel,
- will receive scholarships to cover the cost of courses held on the Ivy Tech campus,
- will receive scholarships to cover the cost of certification testing,
- will finish the program with one or more degrees and multiple credentials valued by employers throughout Indiana and the nation.

Under the federal Youth CareerConnect grant, high school students may participate in ITEP at no cost to them or their families. Grant funding covers the tuition for college-level courses as well as the cost of pursuing the nationally recognized certifications that are part of the program and that employers look for when hiring new employees. Scholarship funding is based on budgetary restrictions and is subject to change of the course of the 4-year grant.

For more information, please contact Deanna McMillan, ITEP Academic and Career Advisor, Ivy Tech Community College, Youth CareerConnect Grant, Integrated Technology Education Program (ITEP) at dmcmillan3@ivytech.edu or 765-252-5496.
